✓	Date	Feature	Description
☐		Login	
☐		Main screen	Notes:
☐		First, schedule is not good, should be "my day" and have calendar view	API Capability, Copilot, Gemini, we need the AI to get some keywords based on the keywords we can ask some questions.
☐		Completed visits 1/3, "your target is 8, you need more!!" Should be red because is not enough	We need the map to look brighter more alive.
☐		That's the way most corporations function red means you're in trouble. Yellow means you're doing not bad but not good. Green means you're off the shit list.	Icons, GM, Website, click take you the client. Click on the location of the customer and takes you to the customer. Map. if you press out it takes you back
☐		Note for home screen, any accounts in the area that don't have activity we want to show a caution symbol	If I'm driving it shows my routes and estimated transite time. Visble to the user as well as a Manager.
☐		As in there's accounts in the area that we have interacted with an extra amount of days or weeks	As a Manager I would like to zoom out and see the agents/ reps Everybody on my team on the map. If I select one I can see the route for the day.

✓	Date	Feature	Description
		And the management report also needs to be MVP Essentially, the manager gets a report what they decide to determine what percentage of tasks reps have completed that week	
☐		New user story that we need to write, that's if the sales agent needs to add a prospect account, that would be an account that's not currently in the CRM database. Our AI would have to collect the information and then push the information into the CRM to create the account. That's not MVP but something that we might wanna have for later.	Check the route and how are they doing based on the progress
☐			Menu with dropdown to select customers and if you select it brings the full information to be able to colapse everything.
☐			Replicate how client view info appears from salesforce
☐			Schedule we have the client list.
☐			Change clients with My Tasks. My Days. To do list by client. That satisfies the maps and my day.
☐			Considering life 360, Account (client) names open tasks blue opportunity and match it to what we want.
☐			Home Screen, see accounts, I see the accounts, see an account click the account see a briefing I and If I drill down I see more info on that account.

✓	Date	Feature	Description
☐			Filter on the account page, search 15 miles or search all accounts. My accounts or other people accounts. Based on the geo location it would give you a briefing for the day and search any account.
☐			AI detects when you're near the customer an offer you a briefing on the account. And get some info on what's needed. Give you info.
☐			Ver opciones cercanas y que funcione como un agente que detecta las opciones cercanas.
☐			Ver los tasks hacerlo como ágil.
☐			Ver que el manager pueda dar cierta información previo a una vistia del cliente qeu se muestre en el overview of the day
☐		How did the meeting go ? sequential conversation , prompt the user if we're missing we ask follow-up question	
☐		Report Team Make it a turtle or rabbit to get the representative make it dynamic planned cadence vs completion	Click to see the achievement.
☐		Click the representative and be able to drill down	
☐		plan meetings	
☐		out on the road	
☐		Calendar
